EDUCATION

Bachelor of Computing in Computer Science

Aug 2024 – Jul 2028

National University of Singapore

Singapore

- Cumulative GPA: 4.5/5.0

GCE 'A'-Levels

Feb 2020 – Dec 2021

Hwa Chong Institution

Singapore

- Attained 85 Rank Points with 4H2s

EXPERIENCE

AI Forward Deployed Engineer

Aug 2026 - Present

Univers

Singapore

- Analyzed existing client workflows and proposed solutions around building ontology layers and AI Platforms to improve business efficiency in collaboration with the AI lab heads and GTM team.
- Performed rapid prototyping for proposed solutions to validate feasibility and business impact.
- Conducted research on self-improvement and recursive self-improvement (RSI) agents and implemented SI and RSI loops, integrating them into both in-house and client solution workflows.

AI & Automation Engineer

May 2026 - Jul 2026

Aumovio Singapore

Singapore

- Developed UiPath Robotic Process Automation (RPA) applications to automate processes leveraging LLMs, OCR, and self-written Python scripts for both attended and unattended robot processes.
- Engineered prompts, guardrails, and workflows for LLMs to accurately extract information and to present them in a consistent manner from PDF files of varying templates to a near 100% accuracy while minimizing costs.
- Worked with product managers and senior engineers to make improvements to the applications according to client feedback, both technical and non-technical, following Agile principles.

AI & Software Engineer

Aug 2024 - May 2026

Guidesify Pte. Ltd

Singapore

- Developed and deployed updates to the GenAI SEO Writer App to implement agentic AI capabilities including tools, sub-agents, orchestrator agents, and MCP servers for advanced reasoning and writing capabilities.
- Engineered, developed, and deployed a GenAI-powered B2B app using REST APIs to boost client brands' SEO ratings and digital presence, generating sustained sales revenue for Guidesify as one of their flagship products.
- Developed and deployed a Singapore company UEN Search web application with REST APIs using Svelte and SvelteKit, providing data on over 500,000 companies with minimal database storage usage. The app went on to increase the company's digital impressions by over 200% within 48 hours.

PROJECTS

PawPress CMS

React, Next.js, Tailwind, Supabase, PostgreSQL, Lexical

- Developed a live no-code CMS framework for blog posting compatible with being hosted as a static website.
- Used Supabase for CRUD operations and implemented Row Level Security for the CMS operations.

Resumeow

React, Next.js, Tailwind, Supabase, PostgreSQL, Google Auth, LaTeX, OpenAI SDK, OpenRouter, Agentic AI

- Developed an agentic AI-powered resume builder that builds LaTeX resumes without requiring LaTeX knowledge.
- Engineered a customised harness for the AI agent to specialize in crafting resume with user-given direction.

NUS Buffet Response Mobile App

React, React Native, Supabase, Expo Router

- Implemented user registration, authentication, and CRUD operations with Supabase.
- Developed an interactive map with Google Maps API and implemented a forum-like chat feature with Supabase.

SKILLS

Programming Languages: JavaScript/TypeScript, HTML5, CSS, Python, Java

Frameworks & Tools: React, Next.js, Node.js, PostgreSQL, React Native, SvelteKit, Tailwind, MkDocs, Git, Hermes
